EXPERIENCE

Cybersecurity Intern — S&P Global | New York, NY / Remote

July 2024 – November 2024

- Supported a cybersecurity team during a paid internship, gaining exposure to professional security operations, technical workflows, and enterprise-level cybersecurity practices.
- Assisted with cybersecurity-related tasks, documentation, and team support in a corporate environment.
- Developed a stronger understanding of security fundamentals, risk awareness, internal systems, and professional technology operations.
- Collaborated with team members while learning how cybersecurity processes are handled in a large global company.

IT Support & Front Desk Receptionist — Herschel Kotkes MD | [77 North Centre Ave, Rockville Center, NY 11570]

January 2021 – January 2024

- Provided front desk and IT support in a fast-paced medical office environment while assisting patients, staff, and daily operations.
- Helped troubleshoot office technology issues, supported computer systems, and assisted with basic technical problems.
- Managed phone calls, scheduling, patient communication, and administrative tasks with professionalism and attention to detail.
- Worked with multiple office systems and digital tools while maintaining accuracy, organization, and confidentiality.
- Balanced technical support responsibilities with customer services in a professional healthcare setting.

Freelance Web Designer / SiteSuite — Self-Employed | Queens, NY

2025 – Present

- Designed and built modern websites for local businesses, with a focus on clean layouts, mobile responsiveness, and business credibility.
- Created websites for landscaping, automotive, and service-based businesses to help improve their online presentation and customer trust.
- Communicated with business owners through calls, texts, and emails to pitch website upgrades and explain project value.
- Used AI tools to speed up design, copywriting, layout planning, and website development while maintaining a customized final product.
- Created visual mockups, website concepts, and sales materials to support outreach and client presentations.

PROJECTS

DevNest Guide — AI Coding Tutorial & Challenge Generator | *Personal Web Project*

- Built a website that automatically creates coding tutorials and programming challenges for users.
- Designed the project to help users learn coding through generated lessons, practice prompts, and interactive-style learning content.
- Applied web development, AI-assisted content generation, user experience design, and educational technology concepts.
- Demonstrated ability to create practical tools that combine programming, automation, and user-focused design.

Local Business Website Portfolio — Freelance / Personal Portfolio |

- Created multiple website mockups and full-page website designs for local businesses.
- Focused on professional branding, strong calls-to-action, service sections, customer trust signals, and mobile-friendly layouts.
- Used graphic design and AI-assisted workflows to produce polished websites efficiently.

CERTIFICATIONS

-
- CompTIA CyberSecurity — Security+ [2026] — In Progress
 - S&P Global Cybersecurity Certification(s) — AI for Everyone, EssentialTECH Foundations [2024]
 - Google Career Certificate / Coursera — Google Cybersecurity Cert [2024]
